

Banking Signature Management

Manage and Share your Signatories

Levant WebSignature is a solution that enables banks to share their authorized Signatories within the same bank and with their correspondent banks via the web.

Key Features

Signature Life Cycle:

- Signatories Book Formatting
- Signatures Scanning (Arabic and Latin)
- Internal Approval on signatures and any modification to the Signatories Book
- Chamber of Commerce Approval on signatures
- Batch Management of Amendments made on the Signatories Book
- Signatories Book printing, viewing or saving to PDF
- Archiving old signatures

New Security Technologies:

- LDAP authentication
- Biometric Security: fingerprint authentication
- SMS Notification
- Signature Pad Verification: verify signature shape, pen pressure and time

Enhanced Features:

- Handbooks History
- Multiple Scanner Pages Setup
- Manipulation of Third Party Signatures
- One Pass Capture
- Access Rights from screen to button level
- Automatic Validation of Banking Policies
